Professional Summary

Results-driven systems analyst and technical project manager with 13+ years across ERP, data, and AI-enabled automation. Experienced in translating business needs into high-quality functional and technical specs, leading multi-team delivery, and implementing robust data workflows and BI. Strong SQL, hands-on data skills, and a track record of owning schedules, scope, and outcomes.

Core Competencies

- Systems Analysis and Project Leadership, discovery to deployment
- SQL expert, complex queries and stored procedures, data QA and controls
- Data and BI, migrations, modeling, dashboards, ETL fundamentals
- AI and Automation, GPT APIs, bots, orchestration, n8n and Zapier
- ERP, Priority implementations and integrations, D365 migration exposure
- Cloud familiarity, GCP coursework, basic services usage
- Stakeholder management, backlog and scope control, risk management

Professional Experience

Independent Project, MedOp, AI-assisted medical report tool | 2024 - Present

- - Built an end-to-end web app that structures clinical dictation into exportable reports, integrates GPT-based assistance and data validation.
- - Owned system analysis, UX, data model, prompt design, and cloud deployment workflow, including security, logs, and privacy policy.
- - Implemented SQL-backed persistence and data checks, designed evaluation prompts for quality, and added CI artifacts for fast iteration.

ERP Specialist, Azelis Group, Lidorr Elements | Jun 2021 - Jul 2025

- - Led Priority ERP operations and interfaces; integrated external systems and BI dashboards.
- - Directed migration to D365 including full dataset transfer and reconciliation, customers to balances.
- - Introduced AI-driven elements for decision support and process optimization.

Senior ERP Project Manager, Clalit - SHILA Health Service (via Tulip/Yael) | Aug 2016 - Jun 2020

- - Managed Priority ERP for ~7,500 users across 150 branches; delivered complex finance and logistics initiatives.
- - Implemented automation, supplier portal, and digital signature workflows; coordinated dev, BI, and ops teams.

Priority Developer, EMET Computing | 2014 - 2016

- - Developed ERP screens, reports, and interfaces; integrated AGILE PLM; collaborated with analysts and QA.

Priority Developer, Blades Technology (BTL) | 2012 - 2014

- - Delivered ERP solutions for 1,300+ users; led data loading and UML-based analysis; supported manufacturing modules.

Priority Developer, Medatech Information Technologies | 2011

- - Developed manufacturing, procurement, and inventory modules in Priority; wrote SQL queries and procedures.

Development Project, EUN, Brussels | 2010

- - Designed database schemas and developed a sampling algorithm (SQM) for data solutions.

Education

B.Sc. Information Systems Engineering, ORT Braude College, 2005-2010
