

SERGEI LERNER

Senior Technical Project Manager | AI & ERP Integration Architect Ramat Gan, Israel | +972-54-8600544 | sergei.lerner@yahoo.com [LinkedIn Profile](#) | [Portfolio](#) | **Availability:** Immediate

PROFESSIONAL SUMMARY

Technical Project Leader and Solutions Architect with over 13 years of experience bridging the gap between core enterprise systems (ERP) and next-generation AI technologies. Expert in modernizing legacy infrastructure by integrating **Priority ERP** with **LLM platforms** via **Model Context Protocol (MCP)**, APIs, and agentic workflows.

Versatility Across Organizational Environments: Experienced working in highly dynamic startup environments, where rapid prototyping and agility are essential. Equally comfortable operating within large public sector organizations and global enterprises, navigating governance, compliance, and multi-stakeholder coordination.

End-to-End AI Delivery Capability: Demonstrated ability to lead AI initiatives from concept to production, including system analysis, architecture design, data modeling, and cloud deployment. Recognized for connecting legacy systems with modern AI agents in a way that delivers measurable business value.

Driving AI enabled transformation across ERP, operations, and enterprise workflows.

CORE COMPETENCIES

AI & Automation	Enterprise Systems & Data	Leadership & Strategy
LLM Orchestration & RAG	Priority ERP Architecture	System Analysis & Design
Model Context Protocol (MCP)	SQL & Data Modeling	Stakeholder Management
Agentic Workflows	API Development (FastAPI)	Agile & CI/CD Pipelines
Prompt Engineering	Cloud Infrastructure (AWS)	Root Cause Analysis

Key Technologies: Python, FastAPI, SQL, Docker, AWS EC2, GitHub, Cursor IDE, Postman, REST APIs, Priority Web SDK, MCP

PROFESSIONAL APPROACH & CAPABILITIES

- Problem Solving & Root Cause Analysis:** Known for a structured and analytical approach to diagnosing complex technical and operational issues. Adept at identifying the underlying root cause behind system failures, data inconsistencies, or business process gaps.
- Technical Breadth & Engineering Mindset:** Combines strong engineering fundamentals (Python, SQL, system architecture) with practical experience in modern AI development. Capable of designing structured JSON schemas and integrating agentic workflows for real-world use cases.
- Collaboration & Leadership:** Skilled at guiding cross-functional teams including developers, analysts, and business owners. Known for a clear communication style that simplifies complex technical concepts for non-technical stakeholders.

QUANTIFIABLE ACHIEVEMENTS

- Delivered multiple end-to-end AI POCs in 3 days or less, enabling rapid validation cycles for stakeholders.
- Reduced medical documentation time by approximately 50 percent using the MedOp AI report generation system.
- Drove significant weekly time savings for clients through AI powered workflow automation and optimization.

PROFESSIONAL EXPERIENCE

AI SOLUTIONS ARCHITECT & PROJECT LEAD | *Independent Consultant 2024 – Present Specializing in the fusion of Enterprise Resource Planning (ERP) with Agentic AI.*

- **Priority MCP Server & Multi-Agent Architecture:** Architected and deployed a pioneering Model Context Protocol (MCP) server that exposes Priority ERP data to LLMs.
 - **Strategic Impact:** Demonstrated solution utility to industry executives and Priority leadership, validating the roadmap for future ERP-AI integrations.
 - **VibeCoding-Style Commercial Implementation:** Delivered two complete AI integration use cases on a commercial platform similar to Base44, incorporating complex data retrieval, multi step reasoning, and autonomous workflow execution.
 - **Technical Execution:** Implemented structured JSON schema communication to ensure reliable execution between backend systems and AI agents.
- **MedOp AI Medical Report Generator:** Built and launched a full-stack web application transforming medical dictation into structured clinical reports.
 - Integrated GPT-based reasoning with validation layers and deployed via Docker on AWS, ensuring strict adherence to security and privacy standards.

ERP SPECIALIST & DIGITAL TRANSFORMATION LEAD | *Azelis Group (Lidorr Elements) 2021 – 2025 Led ERP operations and data strategy for a global specialty chemicals distributor.*

- **System Migration Leadership:** Directed a high-stakes migration to **Microsoft Dynamics 365**, overseeing full data reconciliation and system cutover protocols.
- **AI Process Optimization:** Introduced AI-driven analytics for decision support, reducing operational friction in supply chain and finance workflows.
- **Integration Management:** Managed complex BI data flows and API integrations, ensuring data integrity across global business units.

SENIOR ERP PROJECT MANAGER | *Clalit Health Services (SHILA) 2016 – 2020 Managed enterprise-scale information systems for Israel's largest healthcare provider.*

- **Enterprise Scale Management:** Managed a massive Priority ERP installation serving **7,500 users across 150 branches**.
- **Strategic Delivery:** Led the end-to-end lifecycle of strategic digital workflows, including automation for logistics, procurement, and finance divisions.
- **Cross-Functional Leadership:** Acted as the primary bridge between business requirements and technical development teams, ensuring delivery on time and within scope.

ERP DEVELOPER & INTEGRATION SPECIALIST | *Various (Medatech, BTL, EMET) 2011 – 2016*

- Developed complex PLM integrations, inventory modules, and procurement workflows.
- Executed advanced SQL data modeling and stored procedure development for high-volume environments.

TECHNICAL PROJECTS HIGHLIGHTS

Priority Chatbot (MCP-Based)

- Developed a conversational AI interface capable of live data access and multi-step reasoning within the Priority ERP environment.
- Engineered advanced prompt logic to allow natural language queries to trigger complex ERP transactions securely.

AI Engineering & Cloud Infrastructure

- **Rapid Prototyping:** Leveraged cursor-assisted development to accelerate POC delivery cycles.
- **DevOps:** Managed AWS EC2 environments, security groups, domain routing, and containerized deployments (Docker).
- **Interfaces:** Built custom Telegram bots and UI layers to facilitate user interaction with backend AI services.

EDUCATION & CERTIFICATIONS

B.Sc. Information Systems Engineering

Selected Certifications

- **AI & Engineering**
 - The Complete Agentic AI Engineering Course (2025) – *Udemy*
 - LangChain Crash Course: Build OpenAI LLM powered Apps – *Udemy*
 - ChatGPT Prompt Engineering for Developers – *DeepLearning.AI*
 - Python for Data Science & Machine Learning Bootcamp – *Udemy*
- **Data, Analytics & IoT**
 - The Complete SQL Bootcamp: Go from Zero to Hero – *Udemy*
 - Complete Introduction to Microsoft Power BI – *Udemy*
 - Introduction to IoT – *Cisco*
